

# Future Perspectives

Adrian Jäggi (AIUB)

## EGSIEM Final Meeting

University of Bern  
February 8 – 9, 2018

# The future of the Scientific Combination Service

---

- The EGSiEM Scientific Service will be continued with the label COST-G under the umbrella of the International Gravity Field Service (IGFS) of the International Association of Geodesy (IAG).
- COST-G will be a Product Center of the IGFS. The IGFS Terms of References (ToR) are currently adapted. They will be adopted at the next IAG Executive Committee Meeting during the EGU General Assembly 2018 in Vienna, Austria.
- COST-G will be open to all GRACE/GRACE-FO analysis centers fulfilling the EGSiEM standards. Besides the current EGSiEM partners, the Center for Space Research (CSR), Austin, Texas, has already confirmed to contribute by mid of 2018.

# Further activities

---

- The EGSIEM team might also be tied together by applying for an ISSI Team (Letter of Intent: 20 Feb, Proposal: 28 March)
- ...
